## NOVOSTRICTIVE Transducer Touchless

#### TM1

Screw flange Voltage Mobile Applications

#### **Special Features**

- For integration in pneumatic and hydraulic cylinders
- Touchless magnetostrictive measurement technology
- Operating pressure up to 350 bar, peaks up to 450 bar
- Ring-shaped position marker does not contact sensor
- Unlimited mechanical life
- No velocity limit for position marker
- Absolute output
- $\bullet$  Outstanding accuracy performance up to 0.04 %
- Wide range of supply voltage
- Optimized for use in mobile applications with highest EMC
- requirements such as ISO pulses and high interferences to ISO 11452, exceeds E1 requirements
- Other configurations see separate data sheets

#### Applications

- Hydraulic or pneumatic cylinders in
- Agricultural and forestry machinery
- Construction machines
- Vehicles with loading and unloading devices
- Vehicles with extension arms

The absolute position transducer can be used directly in-cylinder and thus enables a compact and cost-effective position measurement. The sensor consists of a stainless steel flange welded to a pressure tight rod and can therefore be used in harsh environments.

The magnetostrictive measuring technology offers excellent accuracy for measuring lengths up to 2000 mm.

The passive ring-shaped position marker allows a mechanically decoupled measurement.

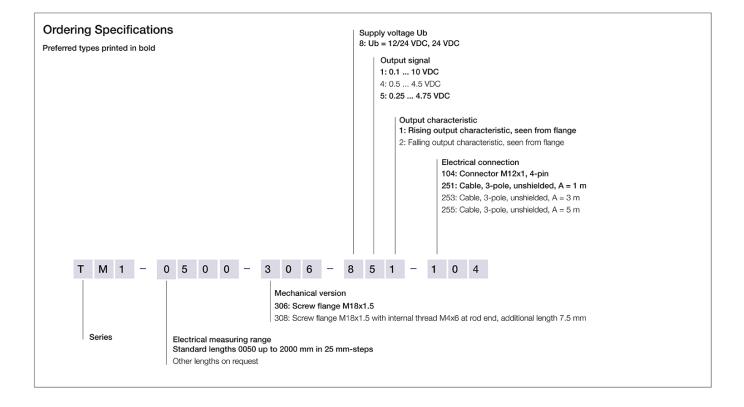

Material	Flange: stainless steel 1.4307 / AISI 304L Flange cover: AISiMgBi		
	Sealing: O-ring NBR 90 SH A		
Mounting	Screwed into cylinder via bushing M18x1.5 for screw plug hole per ISO 6149		
Electrical connection	Connector M12x1, A-coded / Cable 3x 0.5 mm² (AWG 20), PUR, unshielded		

Dimensions

The EMC measurements are conducted in a reference cylinder. The EMC properties can deviate when using different cylinders.	Emission/Immunity	Exceeds E1 requirements	
		The EMC measurements are conducted in a reference cylind	ler. The EMC properties can deviate when using different cylinders.

FS = Full scale: Signal span according to electrical measuring range

## novotechnik Siedle Group

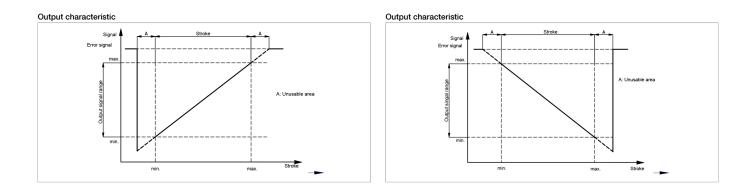

#### Connection Assignment

Signal	Connector	Cable
	code 1	code 2
Supply voltage Ub	Pin 1	BN
GND	Pin 3	WH
Signal output	Pin 2	GN
Do not connect	Pin 4	-

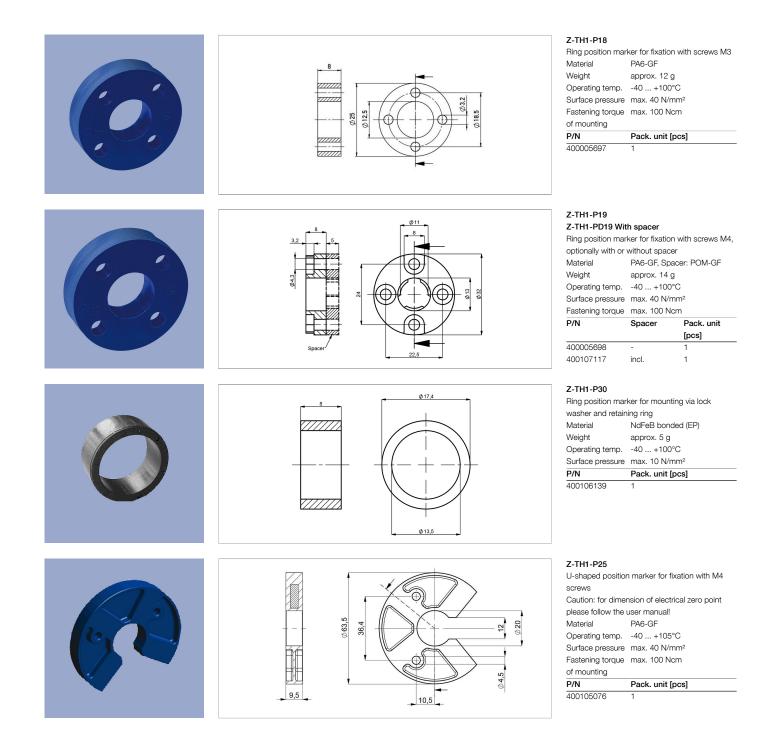

Technical Data Output Characteristics

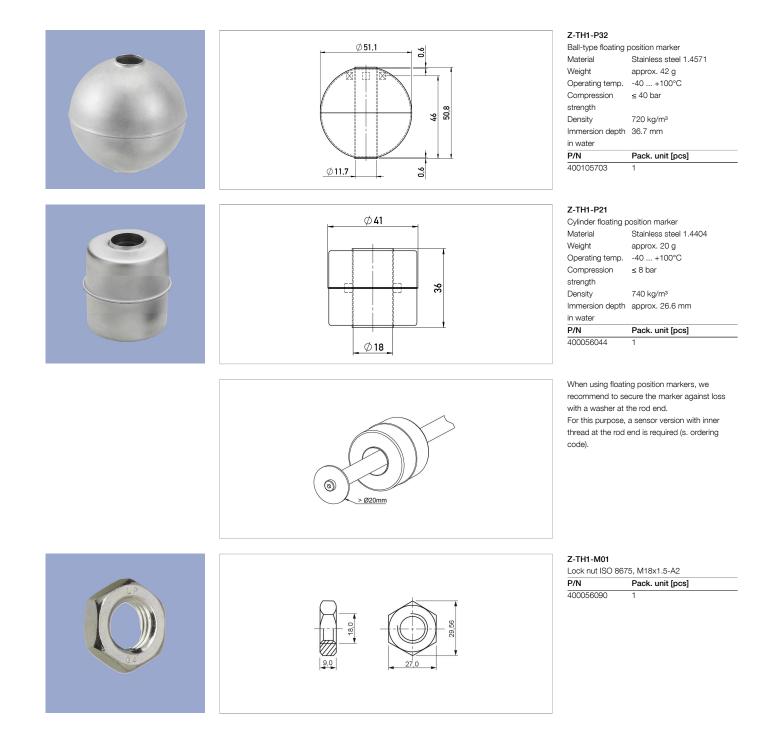

## **Position Markers**

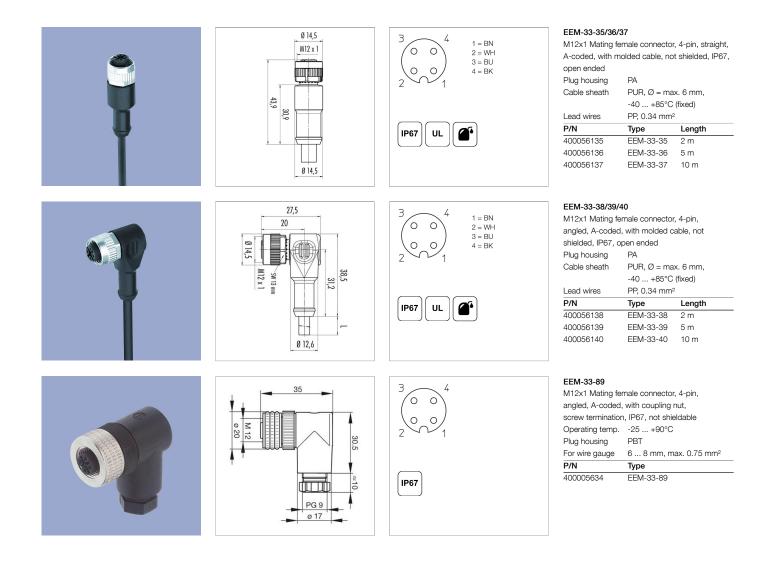

## **Position Markers**

# Connector System M12

Protection class IP67 DIN EN 60529

Protection class IP68 DIN EN 60529

Very good Electromagnetic Compatibiliy (EMC) and shield systems

Very good resistance to oils, coolants and lubricants Suited for applications in dragchains

UL

The specifications contained in our datasheets are intended solely for informational purposes. The documented specification values are based on ideal operational and environmental conditions and can vary significantly depending on the actual customer application. Using our products at or close to one or more of the specified performance ranges can lead to limitations regarding other performance parameters. It is therefore necessary that the end user verifies relevant performance parameters in the intended application. We reserve the right to change product specifications without notice.
