

**NOVOSTRICTIVE
Transducer
up to 4250 mm
touchless
absolute
Series TP1
with Start-Stop-, SSI-,
DyMoS interface**

Special features

- absolute transducer in robust profile design
- NOVOSTRICTIVE non-contacting magnetostrictive measurement principle
- non-contact position detection
- wear-free, unlimited mechanical life span
- Start-Stop pulse interface with normed speed of operation 2800 m/s
- Synchronous serial interface
- DyMoS®-interface with data transfer monitoring
- excellent linearity up to 10 µm
- resolution up to 0.001 mm regardless of stroke length
- low temperature coefficient <15 ppm/K
- insensitive to shock and vibration
- cable or connector version available
- protection class IP67 / IP68

Position transducer with NOVOSTRICTIVE non-contacting magnetostrictive measurement principle for direct, accurate measurement of travel in display- or feedback applications. The measurement with floating position marker takes place contactless and therefore wear-free.

The high mechanical robustness of the transducer in combination with the measurement principle enables measuring stroke lengths up to 4250 mm.

The integrated advanced ASIC electronics provides an standardized absolute output signal.

The passive position marker (magnet) is optionally as floating or guided design available.

The fixing via mounting clamps allows a very simple, flexible mounting and a precise adjustment of the installation position.

The pulse interface allows a fully tolerated processing of both edges of the Start/Stop signal and an usage of up to 3 position markers.

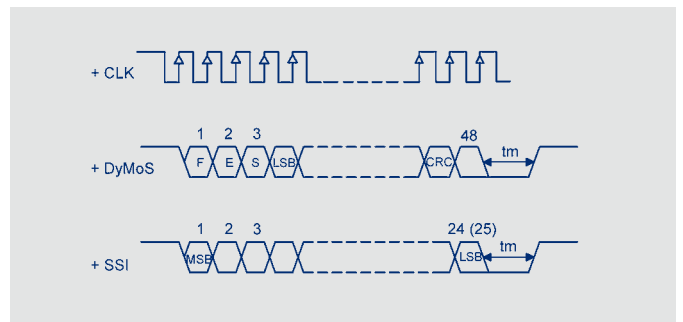

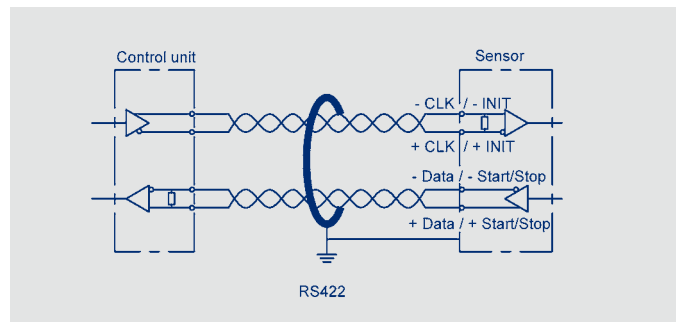

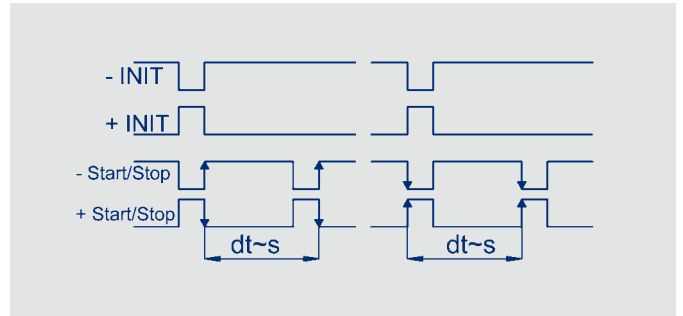

In addition to the familiar interfaces such as the synchronous serial interface with 24, 25 or 26 bit and the Start/ Stop pulse interface also a high-dynamic serial DyMoS®-interface with data transfer monitoring is offered.

The aluminium housing was designed in such a way, that a closed tight construction form with reduced installation dimensions could be realized. The transducer is insensitive to soilings such as dust, humidity or oils.

The advantages of conventional interfaces and bus interfaces have been combined in this DyMoS® interface. In addition to the position value, the DyMoS® interface also allows the actual velocity value to be sent.

Additional interfaces see separate data sheet.

Description	
Housing	Aluminium, anodized, metal end flanges
Mounting	adjustable clamps
Position marker	floating position marker, plastic guided position marker, ball coupling
Measurement principle	NOVOSTRICTIVE touchless magnetostrictive
Electr. connections	8-pin round connector, shielded, M12 x 1 8-pin round connector, shielded, IEC130-9 6-pin round connector, shielded, IEC130-9 8-wire PUR / PVC-cable, 8 x 0.25 mm ² , shielded: 1 m, 5 m or 10 m length
Electronic	SMD with ASIC, integrated Connector casing resp. shield is connected with the sensor housing, housing is capacitive decoupled to the electronic
